NO PASSWORD REQUIRED!**

By July 2024, Maine DHHS aims to establish the Certified Community Behavioral Health Clinic (CCBHC) model, which defines certification processes, reimbursement systems, and included services to support the development of a behavioral health system designed to meet community needs, emphasize outcomes monitoring and accountability, and provide comprehensive coordinated care to any person regardless of diagnosis or ability to pay.

**Come and learn about what this model could look like and
share your thoughts/feedback with us!**
